Projects

Individual Projects

- Gems and jewellery E-Commerce project

Contributed to a gem and jewelry E-commerce project, showcasing expertise in user-friendly ordering, advanced filters, secure payments, and efficient management, enhancing online shopping for enthusiasts.

Technologies used: NodeJS | ExpressJS | MongoDB | React JS

- Web Site for Courier Service Company

Led the creation of an online solution for Fast Courier, optimizing operations. Implemented employee registration, package tracking, secure login, and invoice generation. Showcased OOP skills and delivered thorough documentation.

Technologies used: HTML | CSS | PHP | JavaScript | Bootstrap 5 | MySQL

- Student Management System

Designed and implemented a Laravel-based Student Management system, incorporating comprehensive Add, Edit, Update, and Delete functions. Additionally, developed a Student Management System utilizing a stack of Node.js, Express.js, MySQL, and React.js. Demonstrated expertise in creating efficient, user-friendly solutions for seamless educational data management.

Technologies used: HTML | CSS | php (Laravel) | Bootstrap | MySQL | NodeJS | ExpressJS | MySQL | ReactJS

- Employee Management System

Individually developed a Employee Management System using PHP, with my primary task focused on designing and implementing comprehensive CRUD operations. This project showcases my proficiency in creating efficient web applications for managing student data.

Technologies used: HTML | CSS | PHP | JavaScript | Bootstrap 5 | MySQL

Languages

- English - Professional Working Proficiency
- Sinhala - Native
